Express.js | Node.js | React | JavaScript | RESTful APIs | HTML5 | Git | MongoDB

INTERESTS

- Chess
- Computer Programing

PROFESSIONAL SUMMARY

Dedicated Full-Stack Web Developer with strong proficiency in the MERN stack, showcasing a remarkable capability to utilize Generative AI. Excels in problem-solving and collaboration with a proactive learning attitude. Adept at integrating and optimizing web application components, ensuring seamless functionality and superior software quality.

PROJECTS

1. Shop-Cart - (Flipkart Clone) | ⊕ | ●
JavaScript | Git | CSS3 | Responsive Web Design

- Replicated Flipkart features using HTML, CSS, and JavaScript for front-end development.
- Led design and implementation of user-friendly interfaces and responsive design.
- Implemented secure product listing and checkout processes, enhancing user experience.

2. CaloriScan (Hackathon Project) | ⊕ | ●
React | Git | MongoDB | CSS3

- Collaborated with a team to design and implement a web application using the MERN stack.
- Developed the frontend of the application using React.js, ensuring a seamless user experience for scanning QR codes.
- Integrated Google Vision API for accurate data extraction and object detection of food labels and QR codes.
- Utilized MongoDB for efficient data storage and retrieval to support dynamic updates and inventory management.
- Ensured effective communication between backend and frontend components for real-time calorie and nutrient analysis.
